

# plasticapplications

innovation and durability

The use of polypropylene panels is everytim more usual in many different areas such as chemistry, feeding, building or cattle industry, due to its exceptional qualities. This material offers the chance to manufacture great resistance products and very easy to clean, even with chemical products without damaging its durability.

Standard sizes:

L1200xH800 mm

L1200xH1000 mm

L2600xH1000 mm

Made-to-mesure sizes

Cellular structure

Standard colours

False walls

Multiple uses

Maximum hygiene
