# pigfeeders

conversion and robustness

All our pig feeders are designed and developed in order to achieve the best conversion rate, the best growth of pigs and to satisfy to the most demanding stockbreeders. The new regulation system is very quick and perfectly works whether with flour or pellets, allowing a good adjustment of feed avoiding any waste. Feeders are made of first quality materials and the structure is in 304 stainless steel. We also produce feeders with constant level valves or dry feeders for big groups, and for add libidum sows.

**E-400**  
Dry mixed feeding  
10-110 kg.  
30-40 fatteners

**D-400**  
Dry mixed feeding  
5-25 kg.  
40-50 weaners

**EP-400**  
Dry mixed feeding  
10-110 kg.  
30-40 fatteners

**DP-400**  
Dry mixed feeding  
5-25 kg.  
40-50 weaners

**D-500 pendulum**  
Wet mixed feeding  
5-25 kg.  
40-50 weaners  
(available polymer plate version: DP-500 pendulum)

**EP-500 pylon**  
Wet mixed feeding  
15-110 kg.  
30-40 fatteners

**E-400 valve**  
Wet mixed feeding  
10-110 kg.  
30-40 fatteners

**D-400 valve**  
Wet mixed feeding  
5-25 kg.  
40-50 weaners

**E-500**  
Wet mixed feeding  
15-110 kg.  
30-40 fatteners

**V-300 dry**  
Dry feeding  
+110 kg.  
20 sows
